The mobilizing march is designed to be more than just a march from point A to B. The march, when paired with local outreach efforts, creates the impetus to move every Salvationist beyond the walls of their corps building and out into their neighborhood.

THE MOBILIZING MARCH

MARCH AROUND THE WORLD

Join with Salvationists from around the world and track the miles marched in your community.

The challenge is to collectively march a total of 24, 901.5 miles - the circumference of the earth.

MARCH WITH A FLAG

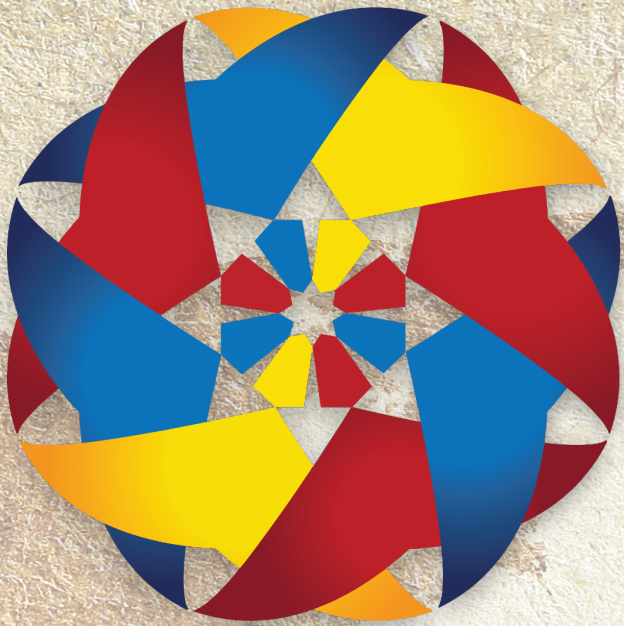

A GPS device attached to a flag pole will allow the miles marched to be tracked and recorded.

This information will be updated on the website.

Marches in local communities are encouraged, with or without the GPS.
